Art Unit: 2876

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 19 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19,21 of copending Application No. 10/459,540. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the currently claimed limitations are found within the copending claims. Regarding current claim 19, copending claim 19 recites a fuel dispenser system with means for supplying fuel, a display and input device, a control system for controlling fuel delivery; copending claim 21 recites a transponder for wireless communications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The examiner acknowledges applicant's request for interference proceedings between the current application and Terranova 6,422,464. The examiner does not deny that the claimed subject matter of Terranova and the current application may properly proceed to interference proceedings. However, all other possible rejections must first

be exhausted. The examiner acknowledges that this current double patenting rejection has not previously been raised. Any inconvenience is regretted. However, as the double patenting rejection is now applied, interference proceedings will not be started until such time that the double patenting rejection is overcome.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.
